**Management Discussion and Analysis**

**For the Quarter Ending**

**May 31, 2007**

The following management discussion and analysis (dated July 27, 2007) of the financial position of Amanta Resources Ltd. ("Amanta" or the "Company") and results of operations of the Company should be read in conjunction with the unaudited and audited financial statements including the notes thereto for the year ended February 28, 2007 and the Company's unaudited interim financial statements including the notes thereto for the period ended May 31, 2007.

## **Overall Performance**

### **Langu Gold Project:**

The Company has completed extensive surface work on the Langu property, including geochemical sampling and geological mapping, trenching and Induced Polarization. Results received to date appear to confirm that an anomalous gold trend extends for over 6000 metres along a north-south strike within the Company's Special Prospecting License areas. A 10,000 metre drill program is currently underway on the property.

### **Doi Ngom Tungsten Property:**

The Company has completed its initial exploration and evaluation program at the Doi Ngom property. The program included systematic mapping and sampling, which identified a large tungsten anomaly, covering an area of 500x800 meter, with the main concentration of high grade mineralized material occurring over the north-south trending silicified ridge which forms the backbone of the Doi Ngom breccia body. In the fall of 2006 the Company conducted a limited structural drilling program at Doi Ngom, to test the contacts of the breccia with the granites to the east and the clastics to the west. Results were announced in a news release dated December 19, 2006.

### **Mae Lama Tungsten Property:**

During the three months ended May 31, 2007 the Company commenced initial exploration programs at Mae Lama, including a limited drilling program. The programs are currently underway.

## **Results of Operations**

During the three month period ended May 31, 2007, the Company completed a non-brokered private placement offering of 7,463,700 units at \$0.32 per unit for gross proceeds of \$2,388,384. Each unit consists of one common share and one-half of one common share purchase warrant, with each full warrant entitling the holder to acquire one additional common share for \$0.45 until November 15, 2008.

The Company has paid finders' fees of \$125,975 plus warrants to acquire 295,002 shares at a price of \$0.32 per share exercisable until November 15, 2008. All of the securities are subject to a four month hold period expiring September 15, 2007.

These transactions were in the normal course of operations and were measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

### Proposed Transactions

There are no transactions proposed that will materially affect the performance of the Company.

## **Risks and Uncertainties**

The Company's principal activity is mineral exploration and development. Companies in this industry are subject to many and varied kinds of risks, including but not limited to, environmental, metal prices, political and economical.

Although the Company has taken steps to verify the title to mineral properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements or transfers and title may be affected by undetected defects.

The Company has no significant source of operating cash flow and no revenues from operations. None of the Company's mineral properties currently have reserves. The Company has limited financial resources. Substantial expenditures are required to be made by the Company to establish ore reserves.

The property interests owned by the Company, or in which it has an option to earn an interest are in the exploration stages only, are without known bodies of commercial mineralization and have no ongoing mining operations. Mineral exploration involves a high degree of risk and few properties, which are explored, are ultimately developed into producing mines. Exploration of the Company's mineral properties may not result in any discoveries of commercial bodies of mineralization. If the Company's efforts do not result in any discovery of commercial mineralization, the Company will be forced to look for other exploration projects or cease operations.

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous material and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties and properties in which it has previously had an interest. The Company conducts its mineral exploration activities in compliance with applicable environmental protection legislation. The Company is not aware of any existing environmental problems related to any of its current or former properties that may result in material liability to the Company.
